This book explores the fast-growing ‘boycott China’ movement. Subscribers to this project claim that China is the architect of the mass destructive COVID-19 Pandemic.

This text’s title refers to Beijing and not China. Claims and sentiments in this book are directed towards China’s Communist Party (CCP) and not its champion people.

The first section explores context. It outlines the most prominent Crimes against Humanity that accusers claim is perpetrated by the CCP within China’s borders and beyond.

The next part places Beijing’s alleged crimes in a world context. It identifies its global business partners. This global deep state crime cartel may be dissolving in real-time.

The penultimate section explores global reach industries that Beijing controls. It concludes by reiterating Crimes against Humanity that have been perpetrated against Chinese nationals by Europe’s inbred Royal Crime Families.

## China

It is beyond this text's scope to outline China's ancient history and its contemporary political economy. The essential facts of the latter, from a Western perspective, are easy to source. This reader strongly encourages free-thinking, free-willed intelligent readers like you to take nothing for granted. Please carefully fact check data that you believe is core to understanding narratives about China's political economy and society. This advice applies to content in this modest book.

The cynical politicization of economic and social data is the norm in Beijing. All information is tightly controlled by the CCP. Achievements are grossly exaggerated to flatter the insecure, paranoid dictatorship. China's official economic growth figures are unreliable. They are splurged upwards to attract foreign investors and to win the hearts and minds of its brainwashed citizens.

A massive number of professional researchers and journalists concur that Chinese society exhibits the dominant traits of the seven Project topics that feature above. I define ‘Chinese society’ to include Mainland China and its Administrative Regions – Macau and Hong Kong. Beijing’s project is not complete. Its arch controllers continue to consolidate their totalitarian control over all aspects of individuals, families and entities who reside in China’s jurisdictions.

Nano-surveillance, global enslavement, and brutal control of planet Earth is Beijing’s sadistic end game. A robot controlled Artificial Intelligence slave hell gulag matrix that looks like North Korea on steroids. The sick, disabled, and unskilled are surplus to this serf labor society that serves the 0.001% ‘elite’ Crime Family Dynasties such as the Li and Soong mass murder mafia clans.

These prophetic dystopia books foretell of a cruel, soulless society that mirrors the end game outlined on the prior page. Readers may access free PDF copies via this book's references section.

1984 is a dystopian novel set in Britain. Its residents are victims of perpetual war, universal government surveillance and MK Ultra mind control. Free-thinking is a prosecutable 'thought-crime'. It is easy to find popular references that support and reject the thesis that America, the West at-

large and the globe are fast trending towards a 1984 state in the year 2020. Think COVID-19.

Literary commentators generally concur that Aldous Huxley's *Brave New World* dystopian novel is the Capitalist version of the socialist dystopia narrated in the fiction work *1984*. to the novel and movie titled 'The Hunger Games'?

## Biowarfare

This is the most important subsection in this book, insofar as it has the strongest connection to its title and objective. Allegations that Beijing is the mastermind behind the Coronavirus pandemic grow cumulatively each day. Readers can find news articles published by famous news outlets that label the Coronavirus by synonyms such as Wuhan Virus, CCP Virus and China Virus.

As far as this author can gauge, relatively speaking, there is a virtual absence of high-profile social commentators and reputable news agencies that strongly support Beijing's position. The overwhelming consensus among news reporters is that COVID-19 patient zero most likely originated in China or the origin is not yet proven. This claim is fiercely contested by Beijing. The CCP fingers America as the "origin" of the novel (*i.e.* new) Coronavirus COVID-19 viral strand.

On March 12, 2020, Chinese Diplomat Lijian Zhao accused the US Government of bringing the Coronavirus to Wuhan, China. This Tweet below is widely reported by mainstream news media.

[twitter.com/zlj517/status/1238111898828066823?lang=en](https://twitter.com/zlj517/status/1238111898828066823?lang=en)

2/2 CDC was caught on the spot. When did patient zero begin in US? How many people are infected? What are the names of the hospitals? It might be US army who brought the epidemic to Wuhan. Be transparent! Make public your data! US owe us an explanation!

This noteworthy public claim broadcast by Chinese Diplomat Lijian Zhao departs from the standard narrative propagated by China's state-owned news agency. This representative article shows how Beijing claim that the Coronavirus *somehow* transmitted from a bat to a human.

GENEVA, April 21 (Xinhua) -- All available evidence suggests that the new coronavirus has an animal origin, and is not a virus manipulated or constructed in a lab or somewhere else, World Health Organization (WHO) spokesperson Fadela Chaib said here on Tuesday.

[xinhuanet.com/english/2020-04/21/c\\_138996483.htm](http://xinhuanet.com/english/2020-04/21/c_138996483.htm)

"It (the novel coronavirus) most probably has its ecological reservoir in bats, but how the virus came from bat to human is still to be seen, to be discovered," the spokesperson told journalists during a virtual press briefing.

There are two core themes that dominate media discourses that finger Beijing as culpable for the ways that it responded to Coronavirus COVID-19 within its jurisdiction. The first claim is that China concealed or massively downplayed its knowledge of the COVID-19 outbreak that ostensibly occurred at the end of November 2019. This article captures this allegation.

[www.washingtontimes.com](http://www.washingtontimes.com) › news › mar › china-hid-c... ▼

And we don't fully understand its clinical features or **severity**." ... Click to **Hide** ... 'Not a big deal': Trump says **coronavirus downplayed** in first briefing on Jan.

The mass repetition of this theme is noteworthy by itself. As at mid-May 2020, Beijing has not admitted that these claims are true. As far as this researcher can gauge, no credible agency has independently confirmed that these views are factual. The publicly disgraced, pro-Beijing World Health Organization has no credibility. The WHO has no legitimate role to adjudicate this matter.

These allegations directed towards Beijing are the less serious of the two types. Beijing's secrecy may have inadvertently caused trillions of dollars in economic losses experienced by other countries. According to President Trump (WH, 2020b), the prime source of these losses was caused by delays in closing America's borders to foreign visitors. He fingers the World Health Organization and Beijing as culpable for offering bad advice about border control policy.

Another claim in public discourses are allegations that Beijing coordinated the COVID-19 event as an act of bio-warfare. This virus is a weapon that was strategically released against a target. Its arch enemy was America's economy. This author has written a series of free books that identifies dominant themes in these discussions. This 132 pages handbook that features Dr Anthony Fauci on the

cover is the most comprehensive offering. Its conclusion argues that it is near-impossible for researchers and most government agency insiders to decipher the COVID-19 'event'.

There are too many unknown factors and variables being reported by dozens of core data supplying institutions that are endemically corrupt and routinely disseminate disinformation. These include mainstream fake news media (e.g. CNN, Xinhua), cash cow elite fake research universities, governments, and the Beijing-centric WHO. These images of mainstream news articles may offer an avenue of inquiry for those keen to research this complex, unfolding topic.

Curiously, Beijing has publicly fingered America as the perpetrator of a COVID-19 bio-attack.

This independent, exclusively self-funded researcher strongly suspects that the COVID-19 human-made (*i.e.* patented) lab virus is a bio-warfare device that was released by a deep state cartel that aims to sabotage Donald Trump's 2020 Presidential Campaign. This globalist cartel aims to recapture its lost control over America's political economy (see Chapter Two).

Key players in this monstrous cartel may include the House of Windsor Crime Family and rogue CDC agents. The House of Windsor crime clan is the arch sponsor and protector of QinetiQ (UK) and the Pirbright Institute. Pirbright created an original Coronavirus strand inside a British laboratory. Its patenting of the human made Coronavirus prototype hides in plain sight.

#### Coronavirus

**Patent number:** 10130701 [patents.justia.com/assignee/pirbright-institute](https://patents.justia.com/assignee/pirbright-institute)

While Australia has eschewed the more strident approach of the US, which has stopped funding to the World Health Organisation (WHO), it has urged its allies to back an overhaul of the WHO and suggested recruiting independent investigators akin to "weapons inspectors" to determine the source of major disease outbreaks.

This causes news commentators to question whether Beijing has something nefarious to hide.

## Endgame 1: Microchips

The imposition of mandatory vaccines is a hot topic among critical researchers who discuss the COVID-19 scam. Commentators theorize that universal human tracking nanochip vaccine technologies are the end game for the implementation of a global slave matrix New World Order. Independent news researchers question whether so-called ‘social distancing’ laws and public directives are conditioning the masses to accept human dispersion as the new norm. This may be because human bio-chip satellite tracking devices cannot accurately track, monitor, and count human populations that are in proximity, *i.e.*, when they are less than six feet apart. State surveillance of illegal human “clusters of people” having a bit of fun may become the new norm.

If war breaks out between China and another nation or coalition, it will most likely be over China's ridiculous claim to have full military sovereignty over the entire South China Sea. The Spratly Islands is likely to be a hot spot. One only needs to look at a map to see that several nations are hundreds of nautical miles closer to the South and Eastern sides of the South China Sea.

Beijing's overt aggression in the South China Sea will ultimately be its undoing. It will continue to force a coalition of unlikely Asian nations who are wary of forming war-preparation military

alliances with the West. Muslim nations such as Malaysia, Brunei and Indonesia fit this bill. A likely coalition of America, Vietnam, the Philippines, and Japan would ultimately be no match for Beijing in a bloody conventional war. The outcome of a nuclear, AI or space war is less certain.

## Endgame 2: Urbanization

Beijing's rural infrastructure projects are the prototype of the United Nations Agenda 21 totalitarian world order. The global elite crime cartel (Rome, Royals, Rockefellers, Rothschilds, Beijing) aim to force most rural land dwellers into macro cities. State-owned city slave workers shall live in tiny apartments. State assigned slaves work macro state farms. This reality is unfolding in real time in China and beyond. Research and on-the-ground stories about farmers being bankrupted in 2020 on a mass scale are easy to source via online searches and word-of-mouth. Agenda 21 has been in place since 1992. ## Infiltration

Beijing's spy agents use blackmail, bribery, extortion and worse to push their agenda within NGOs and powerful institutions of other nations states. Examples include the military, large corporations, and elite fake research universities. Of course, so do other agencies such as the MI6, KGB, CIA, the Vatican Bank, and the Mossad. Over the past few years, an increasing number of respected, informed independent researchers claim that Beijing's subversive infiltration practices are the most devious and far-reaching of those named above. It is widely accepted that Beijing is the worst and most blatant perpetrator of industrial espionage. Bone 懒 laziness copy-and-paste thievery mentality runs deep in rote-learning Chinese culture. Beijing doesn't have a good track record at rigged international injustice forums, such as those staged-managed by the House of Orange Crime Family, based at the Hague, Netherlands. The Permanent Kangaroo Court of Arbitration rejected Beijing's territorial claims over the entire South China Sea. Readers may access this 11 pages press release in Annex 1 of this book.

**The Tribunal Renders Its Award**      [-CN-20160712-Press-Release-No-11-English.pdf](#)

A unanimous [Award](#) has been issued today by the Tribunal constituted under [Annex VII](#) to the [United Nations Convention on the Law of the Sea](#) (the “**Convention**”) in the arbitration instituted by the Republic of the Philippines against the People's Republic of China.

This arbitration concerned the role of historic rights and the source of maritime entitlements in the South China Sea, the status of certain maritime features and the maritime entitlements they are capable of generating, and the lawfulness of certain actions by China that were alleged by the Philippines to violate the Convention. In light of limitations on compulsory dispute settlement under the Convention, the Tribunal has emphasized that it does not rule on any question of sovereignty over land territory and does not delimit any boundary between the Parties.

Beijing attracts some of the harshest criticism for their human rights abuses from independent human rights NGO's such as Human Rights Watch and Amnesty International. These NGOs criticize Western, Muslim, Asian and other civilization's nation states without fear and favor.

## Endgame 4: Depopulation

The bottom located image on the prior page may serve to inform or remind readers that life is cheap among Beijing's so-called 'elites'. China has a population of *circa* 1.5 billion people. Beijing's elites have no hesitation 'wasting' surplus human slave labor units that merely threaten to obstruct its toxic totalitarian One World Sino Government slave hell gulag agenda.

According to credible human rights NGO's, members of the following cultural and ethnic groups are routinely sent to concentration camps and/or executed without a fair trial if they openly practice their religion or publicly defend their culture inside China: Muslims, Christians, Falun Gong practitioners, ethnic Uighur, Tibetans and other Himalayan ethnic minorities.

## Infowars

Like most major powers, such as G8 member nations, Beijing is a bald-faced liar. It routinely disseminates strategic disinformation (lies) in the most popular online forums via state-employed professional trolls. The pro-Beijing (*i.e.* pro globalist) *New York Times* boldly reports this fact.

## Nuisances

This page is a selective summary list of Beijing's countless Crimes against Humanity. It is merely an inventory of accusations that are levelled against Beijing on a mass scale by reputable NGOs.

Crime		Local/Global	Sample open-access reference
1.	Sex slave labor trafficking	Local	Anti Slavery (2017)
2.	Summary detention, torture, rape, forced labor, execution.	Local	Congress (2016); Amnesty International (2020)

9.	Bio-warfare (COVID-19)*	Global	Pfluke (2020)
10.	Genocide	Both	Fallon (2019)

Beijing has a right to defend itself and to a presumption of innocence. Listing an allegation on this page does not mean that it is partially or fully accurate. Some crimes such as transnational narcotics trafficking may be occurring at the provincial government level and is not endorsed by Beijing. Beijing has supposedly outlawed Fentanyl trafficking (White House, 2019). All .gov sources are potentially biased. China's role in COVID-19 biowarfare may be accidental. A popular theory is that Beijing co-created a COVID-19 bioweapon. Its public exposure was accidental or coordinated by rogue agents (*e.g.* Pfluke, 2020). Please draw your own free conclusions.

## Royals

Rotten Beijing is in likeminded RO company. Its business partners include money laundering, child sex trafficking, warlord crime families: Rome (Venetian Black Nobility), Royals, Rothschilds and Rockefellers. These Anglo sub-humans hide out in notoriously secretive states like Switzerland and Liechtenstein where they run the Bank for International Settlements and the Vatican Bank.

A picture is worth 888 words and 666 thoughts.

On March 25, 2019, Chinese Premier Xi Jinping (or one of his body many doubles) led business negotiations with the French Royal Family, *i.e.*, the Grimaldi Crime Family of Monaco. This regal mafia clan represents the French faction of the Rothschild Banking Crime Family Empire.

To be fair, Beijing's mafia *modus operandi* is no different to the tactics employed by other nuclear armed military powers such as Israel, America, Pakistan, and Britain. On the other-side-of-the-coin, Beijing is not a world leader in promoting economic justice and stability. Far from it.

*Beijing plans to murder as many Americans (in particular) and Westerners as possible.*

Beijing is responsible for the covert murder of millions of Americans and other Westerners.

Claims made on the prior page may shock readers who are new to the notion of strategic human depopulation via covert mass murder. All members of the RO club, plus Beijing engage in strategic mass murder of surplus unwanted human slave labor units. Two factors are essential to understanding Beijing's unconscionable attitude towards justifiable mass homicide.

The first factor is the notion that profit is king. Beijing takes mass murder to a lower sub-sewer level than the notorious RO mass murder club. *Certain* Chinese business executives have no issue with diluting plastic baby milk formula with lethal poisons in the name of profit maximization.

## Spite

Beijing harbors ancient grudges towards the West that may not resonate with most Western mindsets. Please consider this analogy. A family clan who lives in your street are related to ancestors who defrauded, bankrupted, and murdered your wealthy great-great-great-great Grandparents 170 years ago. These law-abiding neighbors have no knowledge of their ancestor's high crimes. They inherited nothing from their criminal bloodline. Would you seek violent, humiliating revenge

on these living ancestors and seek to confiscate their hard-earned assets? Of course not.

Sino royal families believe that it is their ancestral duty to bankrupt, murder and enslave Westerners – British and Americans in particular, for unpunished high crimes committed by the inbred House of Windsor Crime Family more than 150 years ago. Britain's Silk Road opium trade

killed hundreds of thousands of ethnic Chinese and poisoned millions more. In 2020, nothing has changed. Gold worshipping, demonic regal military warlords are the arch masterminds of Afghan Opium Wars, money

laundering and the global trade of slave labor, adrenochrome and child sex trafficking rings.

The image on the prior page aims to summarize the complex, and rapidly evolving global-order of-power as at mid May 2020. A simplistic summary of this diagram argues that a Machiavellian, backstabbing globalist coalition of likeminded murderous bedfellows aims to control the political economy of America by any means possible. Prior to 2017, this mission was almost checkmate.

America is the most difficult sovereign nation-state to bring under globalist control. Around half of this nation's citizens possess multiple firearms, as authorized by America's 2<sup>nd</sup> Constitutional Amendment. Moreover, its military executive fully understands global New World Order geopolitics. The vast bulk of rank-and-file members are fiercely loyal to America's Constitution.

The formidability of America's internal security explains why global crime families, who aim to form a one world government, formed an unlikely coalition to capture America. The three main powers in this coalition are the Venetian Black Nobility (Rome, Religion) and the inbred British-Germanic House of Windsor Crime Family (London, Finance). Beijing is the Eastern axis overlord of this coalition. Russia is a wild card. Its alignment may ultimately decide the balance of power.

Rome, Royals and Beijing do not plan to share power among each other if/when a New World Order One World Government totalitarian regime is established. This author's open access body of works explain this dynamic in further details (*e.g.* Jericho, 2019a; 2019b). In recent weeks, cracks in this fragile coalition have become obvious in mainstream and alternative news media.

Beijing still, Canberra, a.k.a. the so-called 'Australian Government', recently defected from its Renminbi cash addiction partnership with its post 2000 overlord, Beijing. In April 2020, Canberra offered two strong signals that it has tentatively joined the Trump alliance. First, it has publicly called for an independent inquiry into Beijing's role in the global Coronavirus COVID-19 pandemic 'event'. Beijing has publicly stated that Canberra's stance has deteriorated bilateral relations.

We express strong displeasure and firm opposition against the irresponsible remarks made by Australian Foreign Minister Marise Paine on April 19 on the arrest of anti-China elements who agitate chaos in Hong Kong by the Hong Kong police in accordance with law. The above act of the Australian side, disregarding facts and truth and confusing right and wrong, grossly interferes in China's internal affairs. Hong Kong is part of China, and Hong Kong affairs are China's internal affairs, which no foreign country has the right to interfere. The Chinese side urges the Australian side to abstain from any words or deeds that disrupt Hong Kong's rule of law and interfere in China's internal affairs.

With rare exception, a 'Made in China' label is code word for disposable crap. It costs more in the long run and performs less, compared to superior alternatives such as 'Made in New Zealand'.

I say with 'rare exception' because many magnificent products are Made in China, like silk. China origin long leaf Black Tea is a personal favorite of this author. Sadly, nowadays I question if this super delicious tea is loaded with mind addicting chemicals and toxic pesticides. To be fair, the same might be

DAR ES SALAAM (Reuters) - Tanzania has suspended the head of its national health laboratory in charge of testing for the coronavirus and ordered an investigation, a day after President John Magufuli questioned the tests' accuracy.

MAY 4, 2020

Magufuli said on Sunday the imported test kits were faulty as they had returned positive results on a goat and a pawpaw — among several non-human samples submitted for testing, with technicians left deliberately unaware of their origins.

Of course, it is possible that these articles above are fake news. Reuters and BBC are very much a part of the fake news politicization establishment club.

## Computers

China is a major global producer of software and hardware tech. This includes assembled parts such as notebooks. The issue of spying is a major reason to boycott all Chinese data and communications technologies. All enterprises in China are government owned or government nano-controlled. The unchecked desire to spy on everyone and everything runs deep in Beijing. You may fairly assume that Made in China tech always spies on you for nefarious purposes.

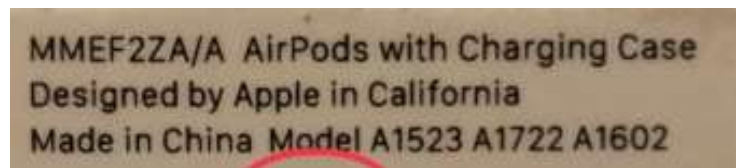

The best way to identify Made in China computer tech trash is by examining product labels shown on packaging, product labels and

websites. Famous tech companies such as Samsung are rightly associated with South Korea. One should not assume that all non-Chinese companies assemble their parts domestically or outside of China.

Thousands of non-Chinese computer tech companies outsource the

manufacture and/or assembly of their goods to China. China's pitiful labor market laws deliberately support the proliferation of cheap sweat shop slave labor gulag farms. As if companies like Apple care. Hey Tim Cook – bring the jobs back home. Your products aren't cheap. You can afford to

support your home nation. National security is a genuine issue.

The best testimonials come from those who speak from the heart and have zero conflict-of-interest in the matter. This writer has no connection to Taiwan or ACER Computers. He does have a great story to share. This author, whose computer brain is about a tenth the size of a Chinese nano-spy chip, bought his first home computer in 2005. An ACER laptop. And boy (or girl), did it exceed his expectations in price and performance. This laptop lasted 9.5 years. It was still working in good order when he gave it away in 2015, when he moved overseas. This computer did not once stall or crash in almost 10 years of use, five years of which included heavy daily use.

## Banned

Huawei data and communications mass distribution services has a mixed global reputation.

Huawei is seen as a massive company that can sufficiently rollout mass cellphone and data

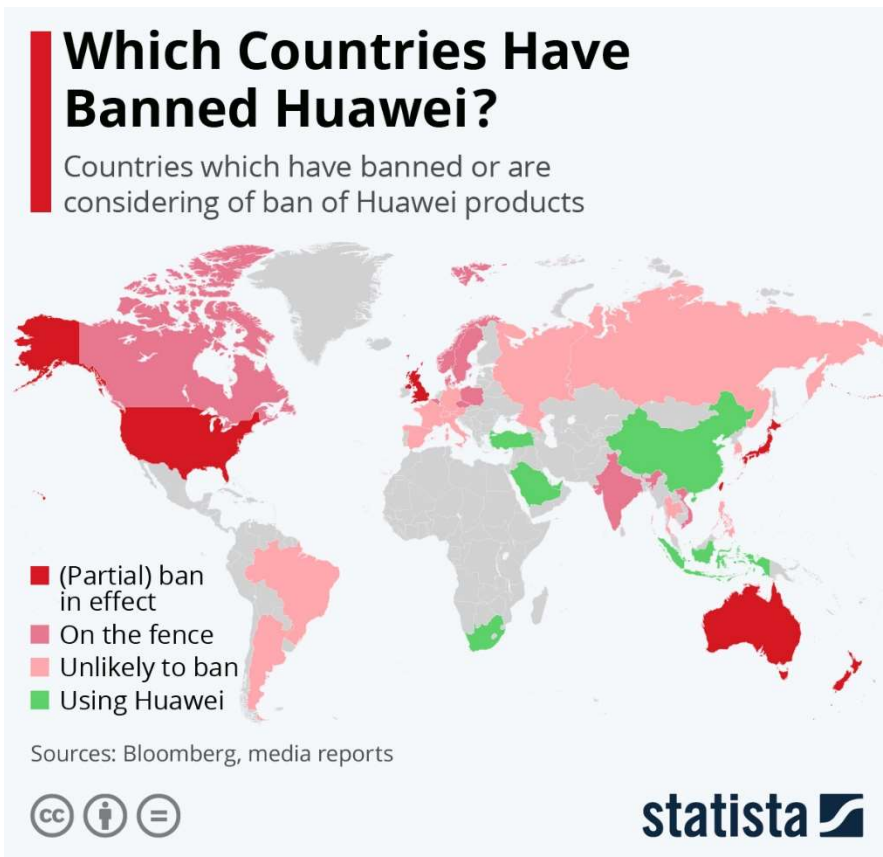

distribution network services on the cheap as it is owned, and slave staffed by the Chinese Communist Party. Huawei's trust factor among well-informed independent consumers is close to zero. Its rating remains very low among most governments. This standing sinks each month.

Huawei's strategic customers such as the British Government are

generally viewed as sellouts by their own people and others. At best, the notoriously corrupt House of Commons was naïve. It took the best price without considering national security. At worst, those at the top of the Westminster slag heap took a wink-wink, nod-nod CCP bribe. You know, like slipping into a quiet directorship at Huawei after they quit parliament. Beyond worse, there is a plot to mass murder Brits via microwave weapons released from the CCP's 5G towers.

Nothing Made in China goes inside any of my holes. Mouth, nose, needle jabs, and the like. That mostly includes food and medicine. The reasons for this are outlined in this book. Made in China poop virtually always cuts corners, to cut costs, and maximize profits – whatever the human or environmental cost. It's hard to enforce this policy 100%. XINHUA NEWS AGENCY

Agencies

China's state-owned monopoly  
propaganda press is like a Bull in a

China shop. Pun intended. It makes a lot of noise and damage and is obvious to spot. Around half of China's propaganda media rags go by the official name Xinhua as in Xinhua fake News Agency.

Some don't go by the Xinhua brand name. Their entertaining *modus operandi* is predictable:

✓ Never criticizes China or the Chinese Government.

✓ Made in China = Perfect.

X Orange Man who loves America = Bad.

✓ Bribed swamp sellouts = We likey.

## China's State-Owned Media Outlets

Forget "Russia Collusion" hoaxes.

Beijing's interference in American,

Canadian, New Zealand's and Australia's elections is a much bigger national security problem.

Red flag. Pun intended. Be wary of political candidates that China's media flatters.

Big Pharma the harmer? Please research widely and freely decide. And resist being swayed by agenda pushers who pose leading questions (based on deep research). That was a lame (joke).

This page is an echo-chamber of a repetitive theme explored on prior pages. Cheap, corner-cutting, corrupt business practices exist in Beijing's massive pharmaceutical industry. Healthcare is a life-and-death industry. The stakes are high. One poison pill may mean death. Peer-reviewed professional research is easy to locate on sites like ResearchGate. Sadly, much counterfeit research is as fake and as dangerous as counterfeit Made in China Viagra and other medicines.

Dangerous counterfeits are not a recent development. Manufacturing firms are creating dangerous chemical imitations of pharmaceuticals made to look like Lipitor.<sup>46</sup> In 2002, New York authorities broke up a fake Viagra distribution ring originating in China.<sup>47</sup> The products were a perfect imitation of the real thing, and even pharmacists could not discern between fake and real

## Blackmail

In many economist's informed, well-intended opinions, governments that lead nation-states should aim to achieve self-sufficiency, *i.e.* security, in these critical areas: food, water, defense, medical and energy. Failure to do so can result in vulnerability to exploitation by unconscionable, subversive business partners.

Many purposefully choose to not pursue economic security in one or more areas, as they can achieve a better deal via mutually cooperative trade pacts. For example, food-rich New Zealand can trade food-poor Kuwait a million jars of Manuka honey (yum, yum) for 10,000 barrels of oil.

Americans should be concerned about media reports that claim that China supplies the bulk of America's cheaper option generic drugs and antibiotics. America's home-grown pharmaceutical industries were dismantled by trade outsourcing policies of Obama and Bush Jr Administrations.

## Commerce

The Boycott Beijing Bureau may extend beyond household purchases. China is America's largest supplier of commercial goods. It also supplies governments of all levels with a ton of goodies.

Please think long-term when purchasing. Made in China disposable rubbish is cheaper in the short term. Overseas buying reduces jobs locally, long term. It eventually pushes prices higher when there is one monopoly supplier like Amazon.

## Badges

Do you know how to interpret product labels that claim to represent your nation's interests?

Some domestic manufacturers and suppliers cynically exploit patriotic labels. For example, a product shown on the left may source 100% of its components from China. It may assemble 80% of the product parts in China and merely polish the finishing 20% in America.

Please invest time to learn how to decode messages on product labels. You may access the first five pages of the policy document shown below in Annex 2. The full 42 pages is available online for free.

### Representations about entire product lines

Manufacturers and marketers should not indicate, either expressly or implicitly, that a whole product line is of U.S. origin ("Our products are made in USA") when only some products in the product line are made in the U.S. according to the "all or virtually all" standard.

## ¥ Renminbi ¥

An effective way to undermine brutal totalitarian regimes like Beijing is to boycott their toilet paper, oops, I mean their fiat fairy dust paper currency. The currency of the magnificent nation, China, is the Renminbi. The international code for this currency is CNY, as in Chinese Yuan. The Renminbi may be abbreviated as CNH in Hong Kong. It is often abbreviated at RMB, symbol ¥ .

There are two main ways to avoid using the ¥. The first way is to simply not visit the land of the Panda. Visitors to China must pay for most things in Renminbi cash or other modes such as cards or bank transfers. The other way is to request alternatives for settling payments if a vendor states that payment must be in ¥. If you respond, “But madam, I can only pay you via Euros or USD” the vendor will accept this offer in most cases, rather than lose a sale. Money talks all languages.

If you have a deep urge to visit China, to practice your Mandarin and engage in culture, there are alternatives beyond visiting Mainland China. Anti-CCP sentiment is strong in Hong Kong. And Taiwan’s political economy is mostly divorced from the CCP.

Let’s hope for peace between nations ASAP, so we may all visit **Sichuan** one day and see those sweet

Pandas up close. Until then, let’s not succumb to Pander Diplomacy to the toxic, brutal CCP.

This author strongly recommends that readers boycott all Chinese banks, especially the toxic Hong Kong Shanghai Banking Corporation (HSBC). Like most major Western banks, these mafia crime agencies money launder income from the sickest activities. These include child sex trafficking, human labor trafficking, and drug trafficking. HSBC is Royal rotten. To the core.

This is obviously a propaganda MK Ultra mind control type image. Please research widely and freely decide for yourself.

Most Chinese Banks are beyond bankrupt.

Please, withdraw all your Renminbi ¥ today, while you can.

## Bitcoin

Bitcoin is the Mother of all Finance Scams. It surprises this author that intelligent, well-read people believe so-called 'facts' published by fake news agencies such as Fox and CNN. These liars claim that no identifiable person knows who created, owns, and globally administers Shitcoin. Apparently, sophisticated low intelligence agencies such as the MI6, CIA and Mossad cannot trace the origins of a multi-trillion dollars empire. As if. \*Satoshi Nakamoto = A hook to Satanism.

Slime Magazine is owned by the Rothschild Banking Crime Dynasty.

This clan works the Swiss-Jesuit Bank for International Settlements global SWIFT system – a regime close to collapse. This mafia

## Beatrix

Western elites have inflicted countless human right atrocities upon the people of China and every nation. Mass murder is 'merely' one example. Mean Queen Beatrix masterminded the hijacked Malaysia Flight MH370. This aircraft was later used to orchestrate a shootdown of a fake Flight MH17 that was loaded with corpses. Her goal was to use this as a pretext to start war with Russia.

## Pawns

The CCP ruthlessly deploys Chinese slave workers to places such as California and Italy to appease billionaire globalists who aim to avoid paying local workers minimum wages and conditions enshrined by local labor protection laws. It is possible/likely that *some* of these workers engage in on-the-ground espionage.

Please boycott slave labor suppliers such as the CCP.  
Hire local and treat people properly.

Tens of millions of ethnic Chinese people live outside of China. Most of these people were born in their nation of residence and they are loyal citizens of that host country.

There are no excuses for automatically distrusting or abusing someone merely because they are ethnic Chinese or citizens of China. Most Chinese expatriates choose to live in another country as they prefer that nation's culture and values.

# IELTS™

The University of Sydney cash harlot is the public face of the IELTS human trafficking crime syndicate. The phony IELTS test has scammed billions of dollars from international students from India and China who studied in Australia and Canada.

[www.ielts.agency](http://www.ielts.agency)

IELTS use examiner fraud to repeatedly fail most international students. IELTS Writing score 6.5 is a fake fail grade. Repeat fake fail scores denies students the right to migrate to these countries after graduation, as promised by false claims advertised by these nations' official migration regimes.

The IELTS human trafficking crime racket is owned by Cambridge University, the British Council and Australia's 38 public universities, whose insatiable diploma mill greed knows no bounds.

## Cambridge English

Citizens of all nations may consider boycotting these vultures: IELTS, Cambridge Uni and Sydney University.

Please support English language testing agencies that do not engage in racist, transnational human trafficking crimes. TOEFL may be a better option.

## Bilocating

Did a real Ji Jinping ever exist? Is CCP Dictator for Life merely a pin-up poster avatar concept? Is Pooh nothing more than a concept – a stable fatherly image that replicates the CCP’s eternal power? Handsome Xi has more younger body doubles than I have surplus chins.

Ah, no. —→

For those looking for a good laugh to end this book, I recommend that you watch this CCP produced video. CGTN is CCP propaganda news. In this hilarious video, it is obvious that a fake image of Xi Jinping in a TV studio, is copied and pasted over footage that shows adoring parade crowds.

Yes, of course it is. Hundreds of thousands score perfect 9.0 for reading, speaking, listening but only get 6.5 for writing every time. **PRESS RELEASE**

---

**THE SOUTH CHINA SEA ARBITRATION**  
**(THE REPUBLIC OF THE PHILIPPINES V. THE PEOPLE'S REPUBLIC OF CHINA)**

The Hague, 12 July 2016

**The Tribunal Renders Its Award**

A unanimous [Award](#) has been issued today by the Tribunal constituted under [Annex VII](#) to the [United Nations Convention on the Law of the Sea](#) (the “**Convention**”) in the arbitration instituted by the Republic of the Philippines against the People’s Republic of China.

This arbitration concerned the role of historic rights and the source of maritime entitlements in the South China Sea, the status of certain maritime features and the maritime entitlements they are capable of generating, and the lawfulness of certain actions by China that were alleged by the Philippines to violate the Convention. In light of limitations on compulsory dispute settlement under the Convention, the Tribunal has emphasized that it does not rule on any question of sovereignty over land territory and does not delimit any boundary between the Parties.

China has repeatedly stated that “it will neither accept nor participate in the arbitration unilaterally initiated by the Philippines.” Annex VII, however, provides that the “[a]bsence of a party or failure of a party to defend its case shall not constitute a bar to the proceedings.” Annex VII also provides that, in the event that a party does not participate in the proceedings, a tribunal “must satisfy itself not only that it has jurisdiction over the dispute but also that the claim is well founded in fact and law.” Accordingly, throughout these proceedings, the Tribunal has taken steps to test the accuracy of the Philippines’ claims, including by requesting further written submissions from the Philippines, by questioning the Philippines both prior to and during two hearings, by appointing independent experts to report to the Tribunal on technical matters, and by obtaining historical evidence concerning features in the South China Sea and providing it to the Parties for comment.

China has also made clear—through the publication of a Position Paper in December 2014 and in other official statements—that, in its view, the Tribunal lacks jurisdiction in this matter. [Article 288](#) of the Convention provides that: “In the event of a dispute as to whether a court or tribunal has jurisdiction, the matter shall be settled by decision of that court or tribunal.” Accordingly, the Tribunal convened a hearing on jurisdiction and admissibility in July 2015 and rendered an [Award on Jurisdiction and Admissibility](#) on 29 October 2015, deciding some issues of jurisdiction and deferring others for further consideration. The Tribunal then convened a hearing on the merits from 24 to 30 November 2015.

The Award of today’s date addresses the issues of jurisdiction not decided in the Award on Jurisdiction and Admissibility and the merits of the Philippines’ claims over which the Tribunal has jurisdiction. The Award is final and binding, as set out in [Article 296](#) of the Convention and [Article 11 of Annex VII](#).

**Historic Rights and the ‘Nine-Dash Line’:** The Tribunal found that it has jurisdiction to consider the Parties’ dispute concerning historic rights and the source of maritime entitlements in the South China Sea. On the merits, the Tribunal concluded that the Convention comprehensively allocates rights to maritime areas and that protections for pre-existing rights to resources were considered, but not adopted in the Convention. Accordingly, the Tribunal concluded that, to the extent China had historic rights to resources in the waters of the South China Sea, such rights were extinguished to the extent they were incompatible with the exclusive economic zones provided for in the Convention. The Tribunal also noted that, although

Complying with the Made in USA Standard

<https://www.ftc.gov/tips-advice/business-center/guidance/complying-made-usa-standard>

## Basic Information About *Made In USA* Claims

Must U.S. content be disclosed on products sold in the U.S.?

U.S. content must be disclosed on automobiles and textile, wool, and fur products (*see page 15*). There's no law that requires most other products sold in the U.S. to be marked or labeled *Made in USA* or have any other disclosure about their amount of U.S. content. However, manufacturers and marketers who choose to make claims about the amount of U.S. content in their products must comply with the FTC's *Made in USA* policy.

What products does the FTC's *Made in USA* policy apply to?

The policy applies to all products advertised or sold in the U.S., except for those specifically subject to country-of-origin labeling by other laws (*see pages 15-17*). Other countries may have their own country-of-origin marking requirements. As a result, exporters should determine whether the country to which they are exporting imposes such requirements.

What kinds of claims does the Enforcement Policy Statement apply to?

The Enforcement Policy Statement applies to U.S. origin claims that appear on products and labeling, advertising, and other promotional materials. It also applies to all other forms of marketing, including marketing through digital or electronic mechanisms, such as Internet or e-mail.

A *Made in USA* claim can be express or implied.

**Examples** of express claims: *Made in USA*. "Our products are American-made." "USA."

In identifying implied claims, the Commission focuses on the overall impression of the advertising, label, or promotional material. Depending on the context, U.S. symbols or geographic references (for example, U.S. flags, outlines of U.S. maps, or references to U.S. locations of headquarters or factories) may convey a claim of U.S. origin either by themselves, or in conjunction with other phrases or images.

**Example:** A company promotes its product in an ad that features a manager describing the “true American quality” of the work produced at the company’s American factory. Although there is no express representation that the company’s product is made in the U.S., the overall — or net — impression the ad is likely to convey to consumers is that the product is of U.S. origin.

#### Brand names and trademarks

Ordinarily, the Commission will not consider a manufacturer or marketer’s use of an American brand name or trademark by itself as a U.S. origin claim. Similarly, the Commission is not likely to interpret the mere listing of a company’s U.S. address on a package label in a non-prominent way as a claim of U.S. origin.

**Example:** A product is manufactured abroad by a well-known U.S. company. The fact that the company is headquartered in the U.S. also is widely known. Company pamphlets for its foreign-made product prominently feature its brand name. Assuming that the brand name does not specifically denote U.S. origin (that is, the brand name is not “Made in America, Inc.”), using the brand name by itself does not constitute a claim of U.S. origin.

### Representations about entire product lines

Manufacturers and marketers should not indicate, either expressly or implicitly, that a whole product line is of U.S. origin (“Our products are made in USA”) when only some products in the product line are made in the U.S. according to the “all or virtually all” standard.

### Does the FTC pre-approve *Made in USA* claims?

The Commission does not pre-approve advertising or labeling claims. A company doesn’t need approval from the Commission before making a *Made in USA* claim. As with most other advertising claims, a manufacturer or marketer may make any claim as long as it is truthful and substantiated.

## The Standard For Unqualified *Made In USA* Claims

What is the standard for a product to be called *Made in USA* without qualification?

For a product to be called *Made in USA*, or claimed to be of domestic origin without qualifications or limits on the claim, the product must be “all or virtually all” made in the U.S. The term “United States,” as referred to in the Enforcement Policy Statement, includes the 50 states, the District of Columbia, and the U.S. territories and possessions.

What does “all or virtually all” mean?

“All or virtually all” means that all significant parts and processing that go into the product must be of U.S. origin. That is, the product should contain no — or negligible — foreign content.

## Global class action lawsuit Vs. IELTS

### Community consultation

Dr J Jericho

#### Context

The author of this document, Dr Jericho is the principal volunteer coordinator for a global multibillion dollars (*circa* USD 100 billion) class action lawsuit against the International English Language Testing System (IELTS) syndicate. The IELTS consortium comprises three business partners of equal status: Cambridge Assessment Group, the British Council and IDP Education.

IDP Education is owned by Australia's 38 public universities. The University of Cambridge owns Cambridge Assessment, which designs IELTS tests and commercial materials that support this test. IDP Education and the British Council manage IELTS test centers in around 142 nations.

Annex 1 is a four pages document that summarizes an example of a single civil lawsuit compensation claimed by an individual IDP Education/British Council customer. This annex summarizes possible civil culpabilities of the IELTS consortium. I welcome litigators to add or subtract from this last based on experience and the jurisdiction/s where they practice.

The 317-pages document in Annex 2 is a comprehensive account of the litigious matters that are relevant to IELTS's business model and *modus operandi*. Since April 2018, more than 60,000

people in 12 nations have received copies of this document. This website below is an example that chronicles the mass readership of this dossier. As at mid-late October over 55, 000 people have viewed this 317-pages report at this web address.

[https://www.academia.edu/30592346/400\\_free\\_official\\_IELTS\\_exam\\_preparation\\_resources](https://www.academia.edu/30592346/400_free_official_IELTS_exam_preparation_resources)

Dr Jericho has waited for the IELTS racket to become public knowledge in the post-secondary education sector prior to instigating a global class action lawsuit. Dr Jericho lived on campus alongside international students at the University of Sydney in 2004 and 2005. He taught at this university between 2007 and 2014. He taught at six Australian universities between 2011 and 2018. He is convinced that the IELTS scam is common knowledge in Australia's post-secondary education sector and among Australia's migrant community. For example, see:

[www.sbs.com.au/language/english/i-feel-they-are-harassing-me-says-woman-who-took-ielts-21-times](http://www.sbs.com.au/language/english/i-feel-they-are-harassing-me-says-woman-who-took-ielts-21-times)

<https://www.change.org/p/cambridge-stop-ielts-from-becoming-a-money-making-business-we-need-fair-evaluation-and-transparency>

### **Industry contacts**

Claims in the documents in Annexes 1 and 2 are also common knowledge in the post-secondary education sectors in Canada, New Zealand and Britain. Dr Jericho has links with student and migrant associations in several countries. Dozens (100+) of these bodies may broadcast this IELTS lawsuit to their mailing list and via social media once mention of this lawsuit appears on official law firm letterhead. Dr Jericho owns a mailing list of *circa* 6,000 stakeholders who have contacted him. This includes hundreds of people who have requested to join a class action lawsuit.

## **Duress/Unconscionable Conduct**

The author of this document is convinced that evidence about IELTS's negligence and extortionate business practices and other culpabilities are blatantly evident in official public-access IELTS documents. The IELTS consortium may argue that test-takers have waived their right to litigate on their registration form. This argument may be void in multiple jurisdictions.

Most of IELTS's test-takers require minimum IELTS scores for high-stakes permanent migration visas. For migration to Canada, IELTS as an English language test has monopoly service provider status in around 140 nations. Prior to *circa* 2018, IELTS enjoyed a global monopoly. CELPIP, as an English language test, has since supported Canada's migration program in Canada, New York City and India. The bulk of Canadian bound skilled migration candidates are not proficient in French. Prior to 2012, IELTS enjoyed a monopoly for migration English language testing in Australia.

It is unethical for IELTS to force a vulnerable demographic to waive their civil right to litigate given the high-stakes implications of their service. This unprofessionalism is amplified by the fact that most test takers are citizens of developing nations such as Bangladesh, China and India.

## **Volunteer**

Dr Jericho is available to work full-time as an administrator, liaison and academic advisor to support the law firm/s that coordinates a global class action lawsuit against the IELTS syndicate.

## **Jurisdictions**

The author of this document foresees that multiple legitimate options are available to pursue a global class action lawsuit against the IELTS consortium. One law firm may coordinate a single global class action lawsuit. Alternatively, two or more law firms may coordinate a class action individually or in partnership with another law firm.

## **Statute of limitations**

This may vary by jurisdictions at the national and state/territory/provincial level. Around one million people who have been damaged by IELTS took their last IELTS test pre 2012.

## **Non-financial compensation**

A core aim of the IELTS global justice project aims to secure permanent residency visas for Britain, Australia and Canada for all eligible, interested persons who have been damaged and/or defrauded by IELTS. Persons who were never eligible to migrate to either country may be excluded from this claim. The Canadian, British and Australian Governments are major business partners and enablers of the IELTS consortium. Hundreds of thousands of citizens of India and China have been repeatedly scammed by IELTS Canada, *i.e.*, IDP Education and British Council testing centers in Canada. Canada is a major jurisdiction in the IELTS global lawsuit.

## **Annex 1**

### **USD 100 billion class action lawsuit Vs. Cambridge Assessment Group *et al.***

This list is a first draft summary of civil and tortious culpabilities of the IELTS consortium.

- Negligence
- Intimidation
- False advertising
- Unconscionable conduct
- Failure to supply a service of merchantable quality
- Infliction of physical and emotional distress (*e.g.* duress; unconscionable conduct)
- Fraudulent misrepresentation – marketing an aptitude test as a language testing service.

Ravi Patel v Cambridge Assessment Group

Course: BAsC in Computer Engineering at the University of Ottawa, 2013 to 2016.

Objective: To secure a permanent residency visa in Canada as a skilled worker migrant.

Outcome: Could not secure a permanent residency visa due to repeat failed IELTS scores.

This outcome was due to grossly negligent designs of: IELTS's commercial training materials, administration, Test Report Form and the four components of the IELTS examination.

Ravi Singh's IELTS test scores:

**IELTS** test scores: 2016 and 2017

Skill	Test 1	Test 2	Test 3	Test 4	Test 5	Test 6
Reading	8.5	8.5	8.5	8.5	8.5	8.5
Writing	8.5	6.5	8.5	6.5	8.5	6.5
Listening	8.5	8.5	8.5	8.5	8.5	8.5
Speaking	6.5	8.5	6.5	8.5	6.5	8.5

(Total fees paid for **IELTS** exams: CAD\$1, 980)

For immigration purposes, Ravi Patel needed to achieve four 7.0 scores for each skill on the same test, per Australia's and Canada's skilled immigration laws. Ravi's repeat marginal fail by 0.5 pattern of 6.5 band scores for speaking and writing recurs among millions of IELTS test takers.

## Established Facts

1. IELTS does not publish a unique syllabus document or a curriculum document to support each unique examination cycle.
2. IELTS maintain an internal set of assessment rubrics that are withheld from test takers.
3. IELTS have never published a catalogue of their prior examination content. This non-transparent assessment policy makes it near-impossible for external parties to offer fair and constructive critique. It undermines test-takers' pre-testing preparation.
4. IELTS's public issue assessment rubrics are confusing and do not place assessment criteria into discrete matrix categories.
5. IELTS's assessment system for speaking and writing are subjective (*e.g. c.f. Pearson*).
6. IELTS's customer service grievance policy is not accessible to those who cannot afford to lodge a fair complaint or inquiry about their exam scores or treatment.
7. IELTS market a misleading proper noun, 'International English Language Testing System', to name their Western-centric covert scholastic aptitude test.

8. The IELTS test contains a hidden curriculum that sets most test-takers up to fail.
9. IELTS's examination content contains numerous obvious pedagogical design flaws.
10. IELTS appoint examiners who do not hold qualifications in linguistics or English language assessment *e.g.* TESOL or TEFL.
11. Test-takers are not permitted to see examiners' comments or working notes.
12. IELTS charges their clients a fee to receive vague, generic feedback that rarely aids test-takers. For example, see:
